WASTE WATER RECYCLING

The Institute has installed the Reverse Osmosis water plant in order to maintain prescribed pH value of the drinking water within the campus. Since the ground water pH value is high due to hard water. This causes a largescale health effect leads to formation of kidney stone. To keep up the health of staff members, supporting staff and students, the institute has installed RO water plant in our college as well as in hostel campus. The outlet waste water of RO plant is reused for gardening.
